THE WORLD OVER

TEAR GAS ENDS TRADING PERIOD

FERNIE MINES GET EAST ORDER

POLICE OFFICER SHOT IN REGINA

NEW YORK—A couple of police tear-gas bombs were cynnally discharged in the New York Stock Exchange on Friday, halting all business and creating wild commotion that lasted for some time.

They had been placed in an intake pipe of the building's air cooling system about noon. Within 15 minutes the choking, blinding fumes edited through the structure.

Alton K. Lindley, vice-president of the Exchange dashed to the big zone and clanged it violently, bringing trading to an end. Some 2000 brokers, clerks, messengers and others scrambled for the exits and emerged gasping and wiping their eyes in Broad and Wall streets.

It was the first forced closing of the Exchange since Sept. 6, 1929, the date of the disastrous black explosion.

PHOENIX—As a result of increased sales pressure the Crown's West Post Coal Company at Fernie has secured the entire contract for supplying the Whiting Electric Company with its requirements for manufacturing Koppers' coke, amounting to about \$50,000 a year.

Michael has been supplying a steadily increasing portion about 30,000 tons to this company for the past five years and now entirely supplies the United States field, formerly the source of the remainder. The order is made possible by virtue of the subvention of \$1.50 a ton put on three years ago.

REGINA—Shot down in cold blood by three unknown men, Constable G. Lehnard, of the Regina city police force, died 30 minutes later in hospital. Three shots were fired, one of them striking the constable in the stomach another in the chest. The assailants scattered in different directions and a cordon of police was immediately thrown around the district in an effort to catch the murderers. The act occurred at the southwest corner of the Canadian Liquid Air Company's plant.

FARM TRACTOR WITH AIR BALLON TIRES MAKES RECORD

Enthusiasm of the farmers for pneumatic-tired tractors is making tractor manufacturers seek higher speeds to make more tractor values for hauling or road work. This is an all-purpose farm machine. The most interesting speed performance is the recent official A.A.A. record of 35.4 m.p.h. for 5 miles, made by a tractor at the Wisconsin State Fair race.

Thousands of people watched A. Schroeder, prominent Wisconsin farmer using a new standard farm tractor equipped with the new Low Pressure Tractor Tire show several rows of the hard uneven ground inside the race track oval. Mr. Schroeder then unhitched the plow and turned the tractor over to Frank Strick, famous race driver, who was one of the leaders in the Indianapolis race this year. The crowd was amazed to see the tractor break down the straight stretches at times traveling 40 miles an hour.

A new four-speed transmission development, combined with the pneumatic low-pressure tire development made possible this unheard-of speed. The new highway speed and comfort now available in farm tractors shows how completely the tractor, with these big tires, serves as an all-purpose machine. Demonstrated as in all parts of the country have proved to farmers that tractors using these tires give greater fuel economy in the farm operations, greater traction, do not pack seedbeds, make the farmer's work easier, and save time as well as money.

\$10.25 CONTRIBUTED FOR NAVY LEAGUE

Building to support the Navy League of Canada in its work of assisting widows and orphans of men of the merchant marine service. Carbon citizens subscribed \$10.25 to this cause in a recent campaign conducted here by Fred Cook, organizer of the Alberta Division.

The Sailor Magazine, published

CANADIAN UTILITIES ABSORB THE ASSETS OF UNION POWER CO.

Remaining under the same management and with practically no change except in the name, the Union Power Company, Limited, goes out of existence to be termed as a branch of the Canadian Utilities, Ltd., a large power company with many branches.

For some years the Union Power Company has been controlled by the Dominion Gas and Electric Company, of which the Canadian Utilities is a subsidiary, but up to the present the first company has maintained its original name.

Lee R. Drumheller will remain as manager, but a slight change in the staff will be made shortly, as it is understood that the bulk of the accounting will be done at the Calgary office in future. Light and power rates will remain the same.

Canadian Utilities has operated for years in Saskatchewan, supplying power to many towns in that province. There was no truth to the report recently circulated that the Union Power Company was a subsidiary of the Calgary Power Company. The local company has never been associated with the Calgary Power Company—Drumheller says.

POOL PAYMENT OF \$425,000 MADE

Final payment on the 1932-33 pool was made Friday when Alberts Wheat Pool officials dropped \$425,000 in cheques to the members. Pool operations this year will be the same as last year, either a voluntary pool or members placing their grain on the open market, as they individually decide.

The Pool this year will make no deductions to take care of the 1929 overpayment, for elevator or commercial reserves. It was stated. Initial payment on the 1933-34 pool has been tentatively set at 35 cents, basis No. 1 northern in store Vancouver.

The stampede is bringing out some of the old buck barches. The parade has just gone by the Chronicle office and the variety of vehicles was "wonderful to behold."

quarterly, may be obtained of \$1.00 per annum in addition to your donation to our fund. The regular subscription to the magazine is \$2.00 per annum.

Any further contributions may be sent to Fred Cooke, 1107 15th Ave. W., Calgary.

Results of District Junior Tennis Tournament

CARBON CLUB WINS FROM BASSANO

The Carbon Lawn Tennis Club arranged a series of Junior championships for tennis players in this district and the event was a great success, although the entry was not as large as was expected. Entries were received from Drumheller, Gleichen, Hanna, Healech, Carbon and Three Hills.

M. Yates of Gleichen won the Junior Singles with N. Nash of Carbon runner-up. Miss A. Wise of Carbon was the winner of the Ladies' Junior Singles with Miss P. Yates of Gleichen runner-up. Robert Wise of Carbon carried off the Boy's event defeating H. Wise in the final. Miss J. Heath of Healech won the Girls' Singles, defeating Miss A. Lemay in the final. The following are the details and scores:

Men's Junior Singles—H. Cork, Healech, defeated C. Brown, Drumheller, 6-4, 6-4. M. Yates, Gleichen, defeated L. Bowker, Three Hills, 6-1, 6-2. N. Nash, Carbon, defeated R. Murray, Three Hills, 6-1, 4-6, 6-3. H. Wise, Carbon, C. Hick, Hanna, A. Stevenson, Drumheller, W. Skerry, Carbon, and R. Freyrons, Drumheller, received byes.

Quarter-Finals—L. Wise, Carbon, defeated C. Birch, Hanna, 6-2, 6-0. M. Yates, Gleichen, defeated H. Cork, Healech, 6-0, 6-2. N. Nash, Carbon, defeated A. Stevenson, Drumheller, 6-3, 6-1. W. Skerry, Carbon, defeated R. Freyrons, Drumheller, 6-0, 6-2.

Semi-Finals—M. Yates defeated H. Wise 6-4, 6-4. N. Nash defeated W. Skerry 6-4, 6-2.

Final—M. Yates, Gleichen, defeated N. Nash, Carbon, 6-3, 6-1.

Ladies' Junior Singles—Miss A. Wise, Carbon, defeated Miss N. Downey, Gleichen, 6-1, 6-4. Miss P. Yates, Gleichen, a bye.

Final—Miss A. Wise, Carbon, defeated Miss P. Yates, Gleichen, 6-2, 6-3.

Boys' Singles—H. Wise, Carbon, defeated P. Paxon, Carbon, 6-4, 6-1. W. Rogers, Carbon, L. Legate, Drumheller, and R. Wise, Carbon, received byes.

Semi-Finals—H. Wise defeated A. Legate, 6-2, 6-4. R. Wise defeated W. Rogers 6-0, 6-0.

Final—H. Wise defeated H. Wise 6-4, 6-1.

Girls' Singles—Miss B. McQuade, Carbon, defeated Miss A. Skerry, Carbon, 6-3, 6-2. Miss A. Skerry, Carbon, defeated Miss P. Torrance, Carbon, 6-0, 6-1. Miss J. Heath, Healech, and Miss P. Torrance, Carbon, received byes.

Semi-Finals—Miss J. Heath defeated Miss B. McQuade, 6-0, 6-0. Miss A. Skerry, Carbon, 6-3, 6-2.

Final—Miss J. Heath defeated Miss B. McQuade, 6-0, 6-0. Miss A. Skerry, Carbon, 6-3, 6-2.

LETTERS TO THE EDITOR

Carbon, August 7, 1933.
Editor, Carbon Chronicle.

Dear Sir:—I congratulate you in producing your special edition, on the coming of age of The Village of Carbon. I believe I am voicing the sentiments of all in saying your portrayal of events in the past has been appreciated and thank you for your interesting efforts and patience. There is no doubt it entailed an enormous amount of work on your part.

May the coming years produce even better results, and trusting that every dollar that the Village spends shall get good value. Thanking you.

Yours truly,
OLD TIMER

GOVERNMENT WILL NOT HELP GRAVEL ROAD

MAY DO IT IN 1934

The regular monthly meeting of the Municipal District of Carbon No. 278 was held at the Municipal office, Carbon, on Tuesday, August 7, with all councillors present.

The usual routine business of select affairs was dealt with and it is pointed out that very little direct relief is being handed out by the municipality. Only deserving cases, after thorough investigation, will be recognized.

A matter of importance to everyone was a communication from the Minister of Public Works at Edmonton stating that the government would not give any assistance toward the revamping of the secondary highways from Carbon to Rockford this year. Reason for this was given as insufficient funds to carry on present work without any additional highways being constructed. In the meantime some effort is being made to get local gravel on the road although nothing definite has been decided upon.

The road is still on the works program of the Department of Public Works, and will probably be gravelled within the next year or so.

Prospects of another election may hurry on the work.

The council at this meeting considered the purchasing of a second hand elevating grader for road work and have ordered the machine shipped from Calgary to Swetlow. The full price paid was \$475.

A number of small accounts were cleared for payment.

R.C.M.P. CHECK UP ON LIGHTING OF LOCAL CARS

Warning Given to Automobile Owners Driving With Defective Lights

OFFENDERS TO BE PUNISHED

Constable Backhouse of the R.C.M.P. has been making a check up on all automobiles operating in the district with improper lights and on Saturday evening over forty cars were found with some defects in their lighting system.

A warning has been issued to all offenders and in future any automobile owner driving with only one head light, or with no tail light, will be immediately apprehended and charged under the act.

All automobile owners are advised to check over their lights immediately and get them in first class order. There will be no further warning and the penalty under the act is far more severe than that of fixing up your lights.

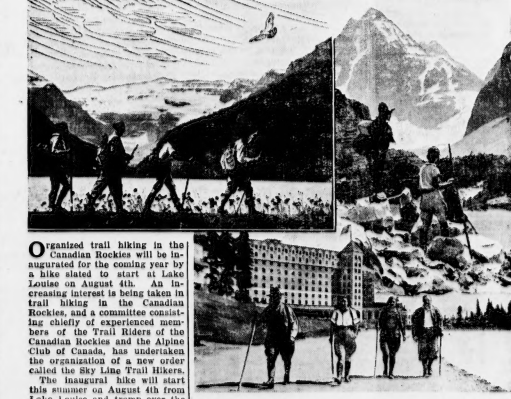

Securities Act On Binder Twine

New Binder Twine Securities Act, which gives retailers right to a mortgage on unthreshed crop, and which is understood to take the place of the previous practice of farmers guaranteeing the banks on binder twine accounts, went into effect on July 24, according to proclamation contained in the current issue of the Alberta Gazette.

This act enables the seller of binder twine on credit to obtain a charge note security for the price of the twine upon the grain crops of the purchaser, grown in the year in which the twine was sold. The amount for which the charge can be obtained is limited to the price of the amount of twine reasonably sufficient to harvest the purchaser's crops, or three and one-half pounds of twine for every acre upon which the purchaser has grain crop growing for the year in which the twine is made, whichever is the lower.

The mortgage note charge, together with interest at not more than eight per cent, may be sold to satisfy the debt over all other charges, liens, mortgages and encumbrances other than three months' liens, and from the proceeds the mortgagee shall have priority over all other first day of July of the year following the year in which it is made.

Sky Line Hiking in the Rockies

Organized trail hiking in the Canadian Rockies will be inaugurated for the coming year by a hike slated to start at Lake Louise on August 4th. An increasing interest is being taken in trail hiking in the Canadian Rockies, and a committee consisting of experienced members of the Trail Riders of the Canadian Rockies and the Alpine Club of Canada, has undertaken the organization of a new order called the Sky Line Trail Hikers. The inaugural hike will start on August 4th, from the saddleback through Paradise Valley and over Scullion Pass to Moraine Lake, where the first night's camp will be made. On Saturday, August 5th, the party will hike from Moraine Lake over Wapiti and Quabik Passes and will have the thrill of crossing two glaciers before arriving at Lake O'Hara. On Sunday the hikers will be able to take in the magnificent scenery around Lake O'Hara—Lake Oest, and Mount Oduay, and members of the party will be able to enjoy the extensive trout fishing in Lake O'Hara. The hike will be held on Monday, August 6th, after which the members will hike to Wapita and catch the evening train back to Lake Louise.

Insist on it

Nature's Laws

In these days much is said and written on the subject of planning—farm planning, industrial planning, social planning, financial planning. Economists, both those who have made a life study of economic principles, trends and problems, and those who assume to speak on economics but have only a superficial knowledge of the subject, are talking and writing on the subject of planning. Governments the world over are engaged with the subject, and world conferences are wrestling with it. As a result, people are confused with the multiplicity of ideas advanced, as in the majority of cases, one set of ideas is contradicted by another set.

However, out of the confusion, there has come the suggestion that nations everywhere should reverse the process they have been following of increasing and expanding production and proceed to curtail production. So we are told, farmers should reduce the acreage they are planting to wheat and cotton and coffee; miners should mine less copper, iron, silver, zinc and tin; smaller quantities of oil should be pumped from the bowels of the earth; fewer fish should be caught; less timber cut; smaller quantities of manufactured articles turned out.

The suggestion is an absurd one. The population of the world is steadily, even rapidly, increasing, and people want more of everything, not less. Why then produce less to meet their needs? The problem that calls for solution is not that there is too much wheat in the world, or that too much oil is being produced annually, but that certain countries for purely national reasons are denying to their people the right to import wheat and in so doing are denying to them the privilege of cheap bread. And what applies to wheat, applies in varying degrees to all other products and commodities.

Nature with her immutable and inexorable laws has a way of controlling production. In this year of 1933 when the story of huge wheat surpluses is heard on every hand, Nature stepped in and reduced the wheat crop of the United States by two hundred million bushels, and struck tens of millions of bushels off the Canadian crop; and reduced the yield in other countries. Drouth, and hail, and grasshoppers, and other insect pests all took their toll, and as a result the world will not produce more wheat than its inhabitants require.

Suppose the acreage sown to wheat, for example, was arbitrarily curtailed by order of governments. Farmers would be obliged to summerfallow the land not needed to produce the reduced crop. It will be acknowledged that the more carefully and intensively the land is worked and cultivated, the greater the production per acre. Consequently, the most certain result would be that larger average yields would be obtained, and the reduced acreage in crop would be offset to a considerable extent by the heavier yields. Therefore, even assuming that less wheat should be produced, reduction in acreage sown might not solve the problem. It may be admitted that there would be an economic saving to the farmer in increasing his yield per acre and sowing fewer acres. Possibly farmers should have followed this practice in the past, and should do so in the future, but not with the object of raising less wheat, but better wheat and more of it per acre at less cost to himself.

And if man decided in his wisdom, or lack of it, to greatly reduce the production of wheat in any one year, Nature might likewise in that year enforce certain of her laws by bringing about a reduction, with the result that man might easily find himself in dire need. Or Nature might offset the puny efforts of man and order climatic and other conditions which would more than offset all man's efforts to lessen production.

Man stands impotent against such cosmic and day follows day without rain; he is powerless when hail lashes his grain crop to the ground; he can wage but a futile battle when grasshoppers and other pests swarm over his fields; he can do nothing if a blighting frost destroys. But Nature has her own ways and methods of control. When grasshoppers increase, a parasite develops which ultimately destroys the hoppers; when rabbits become overly numerous, disease takes them off. Man may wage war against this or that, but he may plan and seek to control, but in the final analysis Nature directs and controls.

There are men who in this day and generation propose to plan and control practically everything, who declare that old laws of supply and demand, or the survival of the fittest, are obsolete, and should be ignored, or overcome. These things, they say, are merely the laws of the jungle, which should have no place in our modern civilization. But the laws of the jungle are Nature's laws, the jungle is Nature's rule supreme, and it is a jungle because no attempt is made to interfere with Nature.

Man may, can, and does control some of the powers of Nature. Working with Nature he can bring about many improvements, and may even control Nature in some of its aspects and workings. But with many of Nature's laws and workings, man can exercise no control whatever. He cannot lengthen or shorten the seasons, he cannot determine the weather, he cannot order the earth to bring forth bountiful crops this year and less than normal crops next year, and he better not try to do it.

The real trouble with the world today is that man has tried to control Nature's law of supply and demand by setting up an intricate network of man-made restrictions, obstructions, barriers, prohibitions, which interfere with the natural working of that law. As a result man has put himself into a huge spider's web of his own making in which he is struggling in futile fashion. He can only free himself, not by a further defiance of and interference with Nature, but by destroying the web he has woven to his own undoing.

May Lose Status

A special despatch from London to the New York Times says: Newfoundland will temporarily lose her status as a self-governing dominion if the British government approves the report of Lord Amulree's commission, which was recently sent to investigate the island's financial policy.

The newest German electric fans, three rubber blades which are said to be harmless if accidentally touched.

In testing electric light bulbs, the Westinghouse Company has found that the electric eye works twice as fast and more accurately than a votometer operator.

Establishment of a mail and passenger service between England and Australia is being urged in Australia.

Police of Glasgow, Scotland, are rounding up counterfeiters.

Any Looseness of the Bowels Is Always Dangerous

When the bowels become loose and diarrhoea, dysentery, summer complaint and other bowel troubles set in, immediate attention should be given and the discharges checked before they become serious.

To these unsatisfactory discharges there is a remedy that has been on the market for the past 38 years. It is rapid, reliable and effective in action. A few doses are generally all that is required to give relief.

Get it at your drug or general store; put up only by The T. Milburn Co., Limited, Toronto, Ont.

Canada's Taxed Property

Total Taxable Real Estate Is Assessed At Eight Billion
The total taxable real estate in Canada was assessed at \$8,222,200,000, according to reports received by the Dominion Bureau of Statistics, for the year 1932.

Another \$1,500,000,000 of assessed property was exempt from taxation, consisting chiefly of Dominion, provincial and municipal property, and educational, charitable, and religious institutions.

Quebec led with \$70,798,000 of exempt property; Ontario, \$356,538,000; Manitoba, \$126,794,000; British Columbia, \$149,275,000; Nova Scotia, \$48,119,000; Prince Edward Island, \$1,828,000. The returns from New Brunswick, Saskatchewan and Alberta do not show the amount of the non-taxable property.

The total taxable valuations in Canada were \$8,752,110,000, of which Ontario had \$3,183,152,000; Quebec, \$2,224,170,000; Saskatchewan, \$1,131,601,000; British Columbia, \$884,000,000; Alberta, \$595,745,000; Manitoba, \$507,103,000; Nova Scotia, \$177,216,000; New Brunswick, \$153,565,000; Prince Edward Island, \$392,000.

Taxable real property, amounting to \$8,222,200,000, was distributed as follows: Ontario, \$2,811,765,000; British Columbia, \$2,210,943,000; Saskatchewan, \$1,089,728,000; British Columbia, \$888,060,000; Alberta, \$579,960,000; Manitoba, \$330,020,000; Nova Scotia, \$140,107,000; New Brunswick, \$132,030,000; Prince Edward Island, \$32,296,000.

Aquarium That Is Different

Queer Fish Kept In Refrigeration Rooms At Port Of Seattle

In a frozen aquarium, believed by officials to be the only one of its kind, strange fish from many seas are kept constantly at thousands of visitors at Seattle every year. The aquarium was not planned, it just grew. Harry E. Carlson, of the port of Seattle, explains, until it is becoming world famous. One day a fisherman brought in a strange fish and wanted to hang it up in the refrigeration room. Then another caught a different variety, rare in these waters. So it grew until there is now a collection of fish that has attracted as many as 1,500 visitors to the plant in a single day. They brave a temperature of ten degrees below freezing to walk through the corridor lined with ice-encased rarities of the deep.

Rewarded For Kindness

Welsh Girl Receives Legacy For Helping Old Lady

An old lady of Swansea who lost her money while travelling fifteen months ago met the girl at Cardiff Railway Station and told her of her difficulty. The girl lent her 10s. The money was returned by post shortly afterwards.

A few days ago the girl, Miss Jean Dawes, a pretty brunette, engaged as a shop assistant at a haberdashery in Pontypridd and living at Llanelli, received a letter from the lady. The latter informed Miss Dawes that the old lady had died and left her £3,000.

Proves Value Of Advertising

Heading Newspaper Ads Often Creates Desire To Shop

The value of newspaper advertising to shoppers and advertisers alike was shown at St. Louis, Montana, in a survey conducted by advertising students of local vocational schools.

Of those interviewed, 1,380 out of 1,450 said they generally read newspaper advertising before planning a shopping trip, while 1,322 out of the total said they had received a letter or visiting card created a desire to go shopping when there had been no plans to do so.

For Safer Flying

Device Lashes Passengers Safely From Disabled Planes

A device which ejects passengers from disabled cabin aeroplanes and lowers them safely to the ground with parachutes was demonstrated successfully at Roosevelt Field, New York, before a group of air line officials and prominent aviators.

At 150 feet, lower than is considered safe for a parachute jump, eight dummies were dropped successfully from a test plane then two parachute jumpers were dropped from 1,500 feet.

London Police Versatile

London policemen, who already must have a practical knowledge of first aid, car driving, swimming, and life saving, are now to be trained as firemen, so that they may be equal to the task of rescuing persons from burning buildings.

SWAN NIAGARA RAPIDS

Without knowledge of the danger William Komrat (above), attempted to swim from the American side to the Canadian shore of the Niagara River below the famous falls. Unfortunately he was carried into the whirlpool and was compelled to swim out of the rapids and whirlpool to safety. This is a feat never before accomplished.

Slated For Retirement

Chief Of Naval Staff Has Had Distinguished Career

The Ottawa Gazette, in a newspaper story said Commander Walter Hogg, chief of the naval staff, department of naval defence, is slated for retirement to be succeeded by Commander Percy Walker Neill, who is at present in England.

Connected with the Royal Canadian Navy for 22 years, Commander Hogg has had a distinguished career. He is in his 58th year.

In 1919-20, he was superintendent of Halifax dockyard and first accept of service under the Dominion Government in 1921. For a time he was captain of patrol.

When Commander Hogg joined the Canadian service he was a retired captain in the royal navy. On August 14, 1932, he was made a commodore, 1st class. During the Great War he was mentioned in despatches and in 1920 was made a companion of the British Empire (military).

Traditions Being Shattered

Rugby School Will Prepare Boys For World Of Industry

One of the most famous public schools is to break away from its ancient academic traditions, to give some of its pupils a "finishing course" which will prepare them for the conditions they will find in industry and business.

P. H. B. Lyon, the Rugby head, made this disclosure at Speech Day celebrations.

"For the first time," he said, "we are to make a serious attempt to cater for those boys who are not going on to the universities."

"We are going to bridge, in their last year, the gap between the school and the world of industry or commerce."

"Changes will be made in the curriculum next year for this purpose."

Would Eliminate Slums

Slums may disappear like magic some day, according to Sir Ernest Roper, former lord mayor of Manchester, at a conference of the Association of Technical Institutions in Manchester. He said a Liverpool chemist, who was an idealist and probably was looking forward a generation or so, had told him that chemists were able to produce a synthetic material to build houses so cheaply and of such beautiful design that slums would automatically disappear.

Artificial flooding has enabled a steamer to pass the Duizier Falls, in Russia, for the first time, and the entire length of the River Duizier is now navigable.

It is estimated that if dental fillings in America alone were all handled in gold jobs, the gold used in all two years would be more than all the gold in the shipwrecks of history.

There are desert mice that have spines, like a porcupine's, growing among their fur.

Columbia wants to organize and subsidize a company which will establish a national merchant marine.

Professor Raps Modern

Method Of Education Says Students' Mind Clogged With Dead Matter

Modern methods of education clogs the mind and as the result modern young people are cheap conscious, really ignorant, selfish and arrogant, their minds filled with dead matter.

This slashing attack on modern methods of education was made by Dr. William Oliver, professor of the School of Organization and Industry at Edinburgh University, Scotland, in an address at the annual conference of the textile industry held at Harrogate, England.

"Modern education tends," Dr. Oliver said, "to hinder mental development by clogging the mind with dead matter. Education has become too pedantic, and in consequence distrust had arisen between men interested in education and men interested in industry."

"The idea that education should relieve its recipients of manual labor was prevalent, and it has been strengthened by the evolution of staff appointments mainly dealing with clerical duties. Manufacturers were largely to blame for appointing their managers from the office, rather than from the machine."

"It is distinctly unfortunate that the present day educational procedure is developing a class of young people who do not wish to work in factories, or indeed to work at all. Many liberally educated young people are really ignorant, selfish and arrogant."

"Wherever a man gets above the standard of bare subsistence he becomes obsessed with the idea that his family should have an easier time than he has had. He falls into the trap of his own selfishness, and his hard work has been the essential factor in any success he has achieved."

Producing Pulp In Canada

Cord Of Wood Yields A Ton Of Chemical Fibre

It is usually considered that a cord of wood will yield a ton of groundwood pulp or half a ton of chemical pulp. This is borne out by the figures of manufacture of wood-pulp for the year 1930, compiled by the Dominion Bureau of Statistics in co-operation with the Forest Service, Department of the Interior. These show that in making the 2,283,130 tons of groundwood pulp produced in that year, 2,241,290 cords of pulpwood were used and that 2,168,880 cords of wood were required to make 1,076,804 tons of chemical fibre. The average production of pulp per cord of wood was thus 2,037 pounds of mechanical pulp groundwood, and 993 pounds of chemical fibre.

Looking For Sandy Beaches

Stefansson Seeks To Search Arctic

Seeking sandy beaches under icebergs will be part of the R.C.M.P.'s arctic patrol work the next two years, for as the "Naosicope" sailed recently bearing about "Mounties" to be stationed in the polar regions.

For the next two years, they had instructions to look for sandy beaches, the night before the "Naosicope" sailed, Vilhjalmur Stefansson, famous explorer, wired Gen. T. H. MacBrien, commissioner of the R.C.M.P., asking him to enlist the co-operation of the red-coats, in searching for sandy beaches under the ice. The wire stated that Stefansson had never recalled having seen one, and he wanted to confirm his own experiences.

Loaned Money On 'Plane

Kansas City Pawnbroker Kept Promise To Take Anything

Ben Hurst, Kansas City, Montana, who advertises the "largest pawn shop west of the Mississippi," boasts that he has never received a loan on anything that had a tangible value, was in a quandary recently.

Willard Herman, Oregon, Mr. Hurst stated that he needed \$250 and had a good aeroplane he could put up as security.

Hurst thought the whole thing over, decided he could not bring a hangar to keep the aeroplane in and told Herman, by mail, to come get his money.

Constitutes A Record

For the first time in the records of the Dominion Bureau of Statistics over, decided he could not bring a hangar from a United States port during the week ended July 14. During the corresponding week in 1932 a total of 460,000 bushels was cleared through United States ports.

Bright red handbags are vogue in Germany.

It's Nice...

To Light Up In The Morning

When the sun begins to shine—and you've rolled your own—"Ogden's Fine Cut." That fragrant, friendly cigarette sure does put a smile on the day. It's so cool and satisfying. And so easy to roll. Ogden's Fine Cut and "Chanticleer" paper... you can bank on that "roll your own" combination morning, noon or night.

SAVE THE POKER HANDS OGDEN'S FINE CUT

Your Pipe Knows Ogden's Cut Plug

Change Hardly Noticeable

American Inch Unit Now Two-Millionths Less In Length

The American inch unit of measurement has lost two-millionths of its former length in order that precise measuring in the United States and England may be done on the same basis. The new definition of the inch is now 25.4 millimetres—a difference of about one-eighth inch in a mile as compared with the former American standard. This minute alteration was made necessary by modern precision manufacturing and the confusion arising from varying standards in the two countries. Gauge blocks now are made correct to within one-millionth of an inch. Both the United States bureau of standards and the national physical laboratory of England will certify industrial gauges on the new basis.

Test Was Satisfactory

First test of the Dymoncar, car, three-wheeled automobile built on the stream-line principle of fast boats, was held at Bridgeport, Connecticut, before 3,000 spectators. With its instructor and designer, Buemaster Fuller at the wheel, the automobile attained a speed of 70 miles an hour over the one-third mile cement test track at Bridgeport.

"If I marry you," said she, "will you let me still keep my job at the office?"

"Will I let you?" he replied. "Dear-est, I'm depending on it!"

About the first thing a physician does is to examine the patient's tongue, probably to see if it will tell what he is worth.

NEW EMPIRE TRADE CRUSADE IS SUGGESTED

London, Eng.—Proposal to send a group of distinguished Canadiana, former members of the Canadian expeditionary force, under leadership of General Sir Arthur Currie of Montreal to a new empire trade crusade to the United Kingdom, has been put forward by Walter John S. Roper, president of the Canadian League.

"This 'crusade' to boost trade between Canada and the mother country was outlined by Major Roper in an address to the convention of the British Empire Service League during discussion of empire trade.

"Our appeal to the British people," declared Major Roper, "will be made directly on behalf of Canada's unemployed soldiers. At the appropriate time we propose to bring over to this country, with the co-operation and assistance of the British Empire Service League and of the British League, a group of our most distinguished soldier-citizens, statesmen, professional men, business men, group which will represent the very highest qualities in our national life.

"We propose to hold a series of meetings all over Great Britain, and addresses will be made to the British people generally and to the trading and financial interests in particular."

General Sir Arthur Currie, commander of the Canadian corps during the war, now principal of McGill University, would lead the expedition group, Major Roper revealed. The proposal had been endorsed, he added, by the Prince of Wales and supported by Dominion Secretary J. H. Thomas, Hon. G. Howard Ferguson, Canadian High Commissioner in London, and the empire committee of the British Empire Service League.

"We propose at such a time to vividly recall the memories of 1914 to 1918," he went on, "and suggest that the magnificent spirit of loyalty and of service and sacrifice for king and country and empire ought not to be forgotten."

The object of the "friendly invasion" would be to impress on the people of Great Britain the virtues of purchasing from Canadian sources those goods they need from abroad and which Canada can supply, said Major Roper.

Under Sir Arthur Currie's leadership the trade ambassadors would appeal to the people in the name of those thousands of Canadian dead in France and Belgium and of the thousands mutilated in the Great War to rally to a new empire crusade, declared Major Roper.

"The point we shall endeavor to drive home," he said, "is the fact that insofar as many of our men are concerned the war was not over, and that they are suffering even now from the terrible curse of unemployment in the land which without a job they cannot serve, and without a shadow of doubt aware."

"What these men require and what they have a right to is to have work so that by their own industry they may carry on as they did before the war."

"But the duty is not ours alone. It lies fairly and squarely on the shoulders of every citizen of our great empire."

Kidnaper Convicted

Death Penalty For Man Who Abducted Kansas Girl
Kansas City.—Walter McGee, confessed leader of the gang that kidnaped Miss Mary McElroy, daughter of City Manager H. E. McElroy, and collected \$50,000 ransom, was sentenced the death penalty by a criminal court jury.

Formal sentence will be passed later by Judge Allan C. Souther. The case was the first in which the extreme penalty has been assessed in the United States crusade against kidnapers.

It is one of the few in history to bring the death sentence where the victim of the kidnapping was unharmed.

The jury deliberated 3 1/2 hours.

Would Ship Butter To New Zealand
Vancouver, B.C.—The Okanagan Valley Co-operative Creamery would reverse the order of things and ship butter to New Zealand, taking in return lumber or fish. Directors of the company have petitioned the Minister of Trade and Commerce requesting him to try to obtain a shipment of Canadian butter to the antipodes.

W. N. U. 2005

High Commissioner

London Representative Has Not Standing Of Cabinet Minister
Ottawa, Ont.—Quebec reaching Ottawa from British newspapers indicate that the question of the Canadian High Commissioner being a member of the Dominion Government is again under discussion in London. Hon. G. Howard Ferguson, High Commissioner in London, is a member of the Canadian Privy Council as was his predecessor, Hon. F. J. Landau.

As such he may attend a cabinet meeting but evidently in some quarters the proposal being made that Canada's representative to the British Government should be a full fledged cabinet minister.

During the war Sir George Perley before he became high commissioner, represented Canada in London while a member of the Borden Government. The argument has been advanced that a high commissioner could more effectively serve Canada if he had the status of a member of the Dominion Government. Under the present arrangement, the high commissioner is responsible to the minister of external affairs, whereas if he were a cabinet minister he would be responsible to cabinet as the holders of the portfolio.

One suggestion made some time ago was that a member of the cabinet serve in London for two years and then be succeeded by another member, thereby always having a representative in close touch with Dominion affairs.

End Economic War

Expect Trade Barriers Between England and Ireland Will Be Ended
Dublin, Irish Free State.—The belief is growing that the economic war between the United Kingdom and the Irish Free State, which resulted from withholding by the Free State Government of land annuities amounting to £10,000,000 a year, will be speedily ended.

"We are not anxious to maintain tariff barriers," Sean Lemass, Minister of Industry and Commerce, declared in the senate. "We will remove the emergency duties now in Great Britain under the terms of the agreement which was a reasonable thing to do."

Mr. Lemass added that if certain members of the United Kingdom government would "show a little sanity" there would be a speedy end to the economic war.

The minister's speech is generally regarded as a distinct advance and gesture to the United Kingdom.

Crowned Wheat King

Freeland Wilford Of Staveley, Successful Alberta Farmer
Calgary, Alberta.—Freeland Wilford, a Staveley, Alberta, farmer, was crowned king of the World's Grain Show, also a prominent stockman of the Staveley, Alberta district. Freeland carries a fine herd of Tamworth pigs, a flock of Hampshire sheep, a herd of Hereford cattle and a number of purebred horses.

In every sense of the word a successful mixed farmer, Wilford will receive a rousing welcome when he returns to Staveley with the wheat crown. Staveley residents, while preparing for a great reception, told how Wilford and his wife had quietly prepared since the fall of 1922 for the Regina show.

In the daytime and under artificial light at night the couple examined bushel after bushel of Reward wheat until he found the sample that carried him to victory at the world's greatest grain exhibition.

Visiting Peace River Country
Edmonton, Alberta.—Preparations for the visit of Mr. and Mrs. L. A. Beasbrough to the Peace River country have now been completed. The government party will arrive in Edmonton Sunday, August 6, and will entrain Monday evening for the Peace River trip which will last five days. A holiday side trip to Jasper Park will follow.

Settles Japan
Tokyo, Japan.—An investigation to determine whether Japan would be justified in occupying France's recently announced occupation of nine Micronesian coral islands is being conducted by the foreign office. The islands lie between the Philippines and French Indo-China at 11 degrees north and 135 east.

Thanksgiving Day
Ottawa, Ont.—Thanksgiving Day this year will be celebrated on the second Monday in October, as was the case last year, it was learned here on good authority.

Viewed As Experiment

Believe Roosevelt Plan Would Not Be Success In Canada
Toronto, Ont.—Toronto business leaders said they did not believe an industrial recovery plan along the lines of that initiated in the United States by President Roosevelt would succeed in Canada. The United States plan of raising pay and shortening working hours, they said, could not be regarded otherwise than as an experiment.

C. H. Carlisle, president of the Goodyear Tire and Rubber Company, said "I am not in favor of President Roosevelt's plan as a plan that would work out permanently. If it works at all, it is a sort of anesthetic for a bad case."

C. L. Burton, president of the Robert Simpson Company, described the scheme as "dynamite." In his opinion, Mr. Burton said, "the less interference by the government with business the better for the wage-earner."

J. Allen Ross, president of the William Wrigley Company, said: "He said he thought the Roosevelt plan had a good chance of success, but admitted 'the whole set-up of this country is different.'"

Herman Trelle Captures Prize
Takes First Place With Sample Of
Regina, Sask.—Herman Trelle, champion grower of Wembley, with his sample of Reward wheat, took first place and a prize of \$1,200 in the class of 10 bushels of hard red spring wheat at the World's Grain Show in Regina, Sask.

In the class of 10 bushels of hard red spring wheat at the World's Grain Show in Regina, Sask., Trelle took first place and a prize of \$1,200 in the class of 10 bushels of hard red spring wheat at the World's Grain Show in Regina, Sask.

Part Played By Empire In World Parley
London, Eng.—"The British Commonwealth of Nations was one of the greatest powers participating in the World Economic Conference," the Prince of Wales declared in addressing delegates to the sixth biennial conference of the British Empire Service League in a banquet hall.

"Because of our position we can never have any narrow, national character," he continued. "For one of the greatest powers in the world to have no narrow, individualistic national character but yet be held by a great bond is a very great thing at present."

The Prince said that after ten years the British Empire Service League had justified its existence among ex-servicemen and among governments in all parts of the Commonwealth of Nations. All parts of the Empire had suffered severely during the last ten years. War veterans of the Empire had borne the brunt of the suffering.

JOURNALIST PASSES

Victim Of Heart Disease
Vincent Burham, famous British journalist and former publisher of the London Daily Telegraph, who passed away at the age of 71. For twelve years, 1916-1923, the distinguished newspaperman was president of the Empire Press Union.

Work Being Done Between Mile 442 and Churchill
Churchill, Man.—Extensive improvements in the Hudson Bay Railway are being made in this division in order to facilitate grain movements and industry in the far north. A work train employing 80 men is at present operating between the pit and Mile 442, Hudson Bay Railway. The embankments on the right-of-way are being widened between the pit and Churchill. Ballasting is also being carried out along the line. About 130 ballast cars are being used on this job.

An extension of trackage to facilitate movement of grain at the terminal elevator is being laid 1,600 feet beyond last year's limits. One work train is making one trip per day to the muckup camp at Mile 442 where muck is being delivered for the covering of the pile line which leads from the reservoir east of the town to the townsite.

Unemployed Congress

National Meeting Of Workless To Be Held In Ottawa
Ottawa, Ont.—The city council has been asked to provide food for the delegates to some hundreds of delegates who plan to hold a national congress of the unemployed in Ottawa, Sept. 9 and 7. The secretary of the national committee of unemployed councils, H. Suia, Toronto, also asked that the city provide food for the delegates.

Last August a similar gathering of the unemployed was held here, with hundreds of unemployed men and women coming to the capital by hitch-hiking, riding freight trains, and on foot. Some rode freight trains all the way from the Pacific coast.

The forthcoming congress was called by a committee appointed at the gathering last August.

Aged Couple

Mouche, Turkey—Hadi Hashin and his wife, Hadi Haddide who are 128 and 124 years old respectively, have appeared in Mouche after migrating from their village of Mulkli. They have 45 children, grandchildren, and great-grandchildren living.

Communists Arrested

Berlin, Germany.—The subcommittee declared that nation-wide police raids resulted in the arrest of many Communists and in the confiscation of large quantities of weapons, explosives, and subversive literature.

Flight Postponed

Molison's Plans For Further Flight Off For The Present
New York.—Captain James Molison said the projected flight of himself and his wife, which was definitely off for the time being.

"I'm not through flying," the Scotsman said as he lay in bed in his hotel recovering from injuries suffered when his plane crashed at Bridgeport, Conn. after a trans-Atlantic hop.

Although he made it plain that their flying plans for the immediate future have not been made, Molison insisted he had in mind obtaining on his return to England, a "plane similar to the 'Seafarer,' the plane in which the couple crashed."

Meanwhile it became known that the "Seafarer" is being prepared for shipment to England on the liner "American Farmer."

Road To Recovery

Industrial Situation Is Showing Signs Of Better Improvement
Ottawa, Ont.—Canada's industrial situation showed further marked improvement at the beginning of July, as compared with the previous year, the Dominion Bureau of Statistics, 8,125 firms were greater than those indicated by the firms making returns for any previous July in any year since 1920.

Establishments reporting data had 71,144 persons on their staff on July 1, as compared with 74,720 on June 1. This increase caused the Bureau's index to rise by 3.8 points to 84.5 as compared with the average seasonal advance of about two points.

Visitor To Canada

British Free Trade Leader Coming To Conference At Banff
London, Eng.—Sir Herbert Samuel, leader of the Free Trade group in the House of Commons and former Home Secretary, will lead the British delegation to the conference on Pacific relations to be held at Banff, Alberta, this month, it was announced. Sir Herbert left for Canada July 28.

He will also attend a meeting of the Royal Institute of International Affairs to be held in Toronto, September 12. At this gathering it is expected to discuss some outstanding empire questions.

U. S. RECOVERY PROGRAM WINS WIDE APPROVAL
London, Eng.—Approval for President Roosevelt's recovery program was voiced in the House of Commons by spokesmen of the three principal political parties.

The debate, which turned upon the world economic conference on the eve of the independence adjournment of that gathering, drew from Neville Chamberlain, Chancellor of the Exchequer, the declaration that the pound sterling is an independent currency, linked neither to gold nor the U.S. dollar.

Independent spokesmen of the Labour, Liberal and Conservative groups declared the United States is not to blame for lack of accomplishments by the economic policy.

"There was no basis on which President Roosevelt could stabilize the dollar with reference to the pound," charged the veteran Liberal chieftain, David Lloyd George, making one of his now rare appearances in the parliamentary discussions.

Asserting the economic conference is dead, Mr. Lloyd George asserted that "the prime minister is engaged in finding the best method of enabling the pound to keep its appearance of life after the spirit has departed."

Cheers greeted the statement from the Conservative member, Wardlaw Milne. It was impossible for the United States to enter an agreement to stabilize the U.S. dollar.

Many speakers referred to "the great experiment" now in progress in the United States. Mr. Lloyd George said:

"There are three experiments now proceeding, on the success or failure of which the whole outlook of the world depends—the Russian, the Italian and the American. The American is the most important."

"I hate to use the word revolution in referring to it (the American), but it is a complete transformation." The debate was forced on the government in order to clear up its policies with regard to such problems as currency and public works.

WOULD LOWER INTER-EMPERIAL TRADE BARRIERS

London, Eng.—Re-affirmation of the agreements reached at the imperial economic conference held last year for Canada and the need for the ultimate restoration of an international gold standard are set forth in an important declaration signed by empire delegates to the World Economic Conference at a meeting held after the conclusion of the international gathering.

The declaration points to the necessity of higher wholesale prices and recognizes the importance of stability of inter-empire exchange rates in the interests of empire trade.

The announcement marks the conclusion of weeks of negotiation conducted in the strictest secrecy, sometimes in private houses and sometimes in cabinet offices in Whitehall. It is signed by the prime minister of the United Kingdom, Canada, Australia, New Zealand, South Africa, and India. No signature was appended on behalf of the Irish Free State whose representative referred the matter to his government.

The delegates declared they were satisfied the Ottawa agreements had already had beneficial effects on inter-empire trade and the benefits were likely to continue. They re-affirmed the necessity for lowering inter-empire barriers to facilitate import and export.

The declaration states again the principles of the Ottawa agreements concerning the raising of wholesale prices and notes that the position obtained an encouraging measure of success. In this connection it is pointed out that since June 1922 the price of wheat in the United Kingdom has risen 12 per cent, while the rise in British prices of primary products for the same period has been about 20 per cent.

The delegates considered, therefore, that it is important the commonwealth nations should continue their efforts of sound finance—a price-raising policy until evidence of equilibrium is re-established. They also considered the expansion of a government's program of capital outlay as a matter for the respective governments in the light of their own circumstances.

The Ottawa policy for the ultimate restoration of the gold standard, under which international co-operation would be secured with a view to avoiding as far as practicable undue fluctuations in the purchasing power of gold is also re-affirmed in the declaration.

Ruling in Marriage Case
Alberta Court Determines Provincial Laws Governing Youthful Contracts
Calgary, Alberta.—A court of appeal has ruled any girl over 12 and any boy over 14 years of age may marry without their parents' consent.

The court held that the provincial law, which declared such cases as exclusively under Dominion government jurisdiction, was unconstitutional.

This judgment was handed down in Edmonton, Tuesday, during appeal court sittings and followed hearing of a case in which a mother attempted to have the marriage of her daughter annulled on the grounds both the daughter and youthful husband failed to obtain their parents' consent. The girl was 19 years of age and the boy 20.

The court held the marriage was valid in handing down judgment. A minority dissenting judgment was handed down by Mr. Justice Clarke.

Western Wheat Crop
Heat and Drought Spoil Excellent Prospects For June Harvest
Ottawa, Ont.—Continued uncertainty as to the prospects for crops on the prairie is noted in the ninth of a series of weekly telegraphic reports on conditions in Manitoba, Saskatchewan and Alberta, published by the Dominion Bureau of Statistics.

Excellent wheat prospects in May were generally blighted in June by drought, and July brought a further decline in the reports.

The unsatisfactory conditions are regional, however, the report explains, and the effect on the whole wheat crop will depend upon the acreage affected.

Edge Is Off Relief
Toronto, Ont.—"The edge is off the relief problem. A large percentage of Ontario wheat growers have been absorbed," said Hon. J. D. Monteith, Ontario minister of public works, in a statement here.

TOWN OF CARBON

Carbon was started years ago and is still progressing from year to year, although material changes are taking place and depressions have slowed up progress. It takes live concerns and good business men—men who take an interest in their business and want to be always improving—to make a progressive town. We are proud to say that Carbon has many such business men and a little more co-operation would be a benefit instead of a detriment to the town itself, and the individual business. One for all, and all for one, would be the best proverb to follow by us all. If we did, nothing could surpass us; no town would take more laudable bounds; advancement than Carbon. That we must live in hope that some day we will have a model town. We are on the right road, but we can't seem to forget petty private-ness long enough to put the town first.

MACKENZIE KING NOT COURTING C. C. F.

Right Hon. W. L. Mackenzie King, in the first speech of his Western trip, dealt clearly with the newly Co-operative Commonwealth Federation showing that the Liberal Party has no intention of courting association with the false doctrine promoted. Renouncing its traditions of freedom of individual action, the Liberal Party could not do so. State control of industry and finance, Mr. King pointed out, inevitably meant that individuals must accept the decisions of those in power as to where they would work, what they could do, and how and when they could do it. A force would inevitably grow up to see that the will of those in authority was carried out.

Citizens inclined to heed the superficial arguments of the C.C.F. promoters would do well to consider the Liberal leader's words. Of course, there is a certain number of people in any country who would prefer to let the State look after them instead of exerting their own energy to help end. The majority of Canadians are not of this calibre. They were helped in an atmosphere of independence. With those there can be no choice between the direction of the individual by a state oligarchy and direction of State affairs by the combined will of the majority. Sovereignty of the State over the individual prevails only in Russia. The original Pacific policy of Italy has been so modified that the individual citizen is not now submerged. Force is dominating factor of Soviet rule. Should the C.C.F. by any stroke of

ill fortune, become the ruling political power, the people would have to expect either closely co-ordinated force compelling adoption of a policy or utter chaos.

Neither the temper of the Canadian people nor the democratic form of government prevailing calls for so radical a change. The voters have it within their ability to express themselves through the medium of the two parties which have served them well this respect is always recognized by the Liberal Party. Moreover where two well defined major parties exist, government proves more stable. Both France and Germany are clear examples of the chaotic state of affairs present when a multitude of parties attempt to direct the national administration.

If the voters are not satisfied with the Conservative Party, they can find expression through the Liberal medium, and they can as readily throw aside a Liberal regime if it fails to measure up to their demands—Toronto Globe.

TEN MODERN COMMANDMENTS

The following are Ten Modern Commandments which every citizen should adopt. Read them carefully and see if you measure up as well as you do to the Moslem version.

1. Thou shalt not go away from home to do thy trading, nor thy son, nor thy daughter.

2. Thou shalt patronize thy home

merchants, for yea—verily, both the home worker spread over the tiding of the goodness and greatness, and many will patronize thee.

3. Thou shalt employ thy home mechanics that they shall not be driven from their homes to find bread for their little ones.

4. Thou shalt not ask for credit as goods cost much and the merchant's brain is burdened with bile. His children clamor for daily bread, and his wife abideth at home for lack of garment as adorneth her sister. Blessed, yea, thrice blessed is the man who pays cash.

5. Thou shalt not ask for reduced price on things 'Influence for suit is in your heart, and the merchant robbeth it like an open book. He laugheth thee to scorn and shouteth to his clerk, ha ha!

6. Thou shalt do whatever lieth in thy power to encourage and promote the welfare of thine own neighbor.

Indications point to a fairly early harvest in Western Canada, and a late July week-end report of the Canadian Pacific Railway agricultural department. A late point in southern Manitoba, the report added, had already started cutting wheat and barley.

Canada jumped to fourth place in bacon exports to Great Britain last May as compared with sixth place in 1929, behind Denmark, Holland and Poland. Total exports to Great Britain from Canada in May were 5,566,000 lbs. or at the rate of 66,960,000 lbs. per annum.

There were increased retail sales in Canada in May as compared with April and the index number of the Dominion Bureau of Statistics rose from 83.7 to 85.6. Hardware had the best showing, the increase being from 75.8 to 112.3.

A spare blue-clad figure which to thousands of passengers through Vancouver in the last seven years represented a symbol of friendliness in a strange way will no more be seen around the wharves and terminals of the Canadian Pacific Railway in the Coast city since Albert Charles Pearson, terminal passenger agent for the company, died there recently.

With rising prices for wool and a vast Chinese market for wheat caused partly by advances in monetary exchange, Australia is rising steadily to a greatly improved economic position, declares Warwick Fairfax, managing director of the Sydney Morning Herald, Australia's oldest newspaper, a traveller recently on the Canadian Australian liner Niagara.

Meeting at a time when the nations of the world were never so much in need of close co-operation economically and politically, the fifth biannual conference of the Institute of Pacific Relations was to be held at the Banff Springs Hotel, August 16-28, is regarded as a possible turning point in the affairs of all the nations bordering the Pacific.

Say Good-Bye to "HUMDRUM"...

ENJOY THE LIFE OF A CHEVROLET OWNER

OPEN UP the road map. Pick out some fascinating spot. Then point the nose of your Chevrolet towards it—and take off!

What does it matter if you must budget on trips? Half the thrill of owning a Chevrolet is the way you can pass by the gas pump—the oil station—and the garage. Weather hot? That doesn't matter either—for Chevrolet has Fisher No-Draft Ventilation. Just turn on the breeze whenever you like, and keep delightfully cool.

and refreshed. Roads bad? Who cares—when you're settled back in this long, full-weight, smooth-engined Six. A long way to go? Chevrolet gives you power glides—pick-up aplenty—and the secure feeling that Chevrolet dependability rides with you as you go.

Most of this year's car buyers are the leaders of Chevrolet owners—motoring smartly and economically in Canada's Great Sales Leader! Low prices and easy GMAC terms.

Better Distribution Needed Rather Than Restricted Acreage When Many Are Lacking Food

"As long as so many people in the world are starving, there is no need in reducing acreage," Neil S. Beaton, president of the Scottish Co-operative Wholesale Society considers. "The right thing is to raise the standard of living of the people so that they can consume nature's bounty instead of restricting it. The world has succeeded in production, it must apply itself to distribution. That is the main object of the consumers' co-operative movement," he declared.

Members of the delegation from the Scottish Society, discussing the question at Saskatoon, did not consider that the maximum possible consumption of bread had been reached. In Scotland when potatoes were scarce the consumption of bread fell to rise again when there was any potato shortage, one of the delegates pointed out.

The representatives of the society visiting the west were: Mr. Beaton, Alexander Buchanan, a director, and William Smith, grain buyer and manager of flour mills. They were inspecting the property of the society in Saskatchewan which includes nine grain elevators. They later attended the wheat conference at Regina and the conference of the Co-operative movement also held there during the time of the World's Grain Show.

The Co-operative movement in Scotland had more than held its own during the depression and Mr. Beaton answering a question. The sales of the Wholesale Society had remained steady at about 16,000,000 pounds for the past four years, but at the lower prices this involved a considerable increase in bulk of goods.

The wholesale organization was employing more people than before the depression, at the end of 1932 there were 10,507 employees. Mr. Beaton answering a question. The sales of the Wholesale Society had remained steady at about 16,000,000 pounds for the past four years, but at the lower prices this involved a considerable increase in bulk of goods.

Value Of Farm Land

Like Everything Else Worth Only
Only What It Can Earn

What is good farm land worth? An Englishman stated not long ago that the best land in England, where the average production per acre of all crops is much higher than in Canada, the market is at the door, the growing season is longer and the climate generally more favorable, can be bought for \$100 or less per acre. It can be bought at all. With an experience of two thousand years behind them, English farmers are pretty likely to know what value their land has. Do they wonder why land in Canada can earn interest on a very much higher value than that, except in a very few highly favored spots, and then only by intensive cultivation of high-priced perishable fruits and garden truck. One of the principal causes of much of the present trouble of farmers is that they paid, or promised to pay, more for their land than it is worth and their mortgages represent more than the actual value. Land, like anything else, is worth only what it can earn.

Youngest Woman Barrister
Miss Yvonne Stranger, aged 21, who has just been called to the bar of the Middle Temple, London, is the youngest woman barrister in the United Kingdom. She passed her examination some time ago, but had to wait until she became of age before being called.

Sheep In New Zealand
New Zealand has more than 280 sheep to the square mile, and over 20 to every man, woman and child in the Dominion, according to a recent census. New Zealand is boasting that the large sheep increase is because the country has no droughts.

Her uncle was taking little Betty to church for the first time. When the time came for prayers, he told her to kneel down and shut her eyes. For a while all went well. Then a pipping voice rang through the silence: "Uncle, what are we hiding for?"

Conditions In Russia

Claims Soviet Power Gained By Food Supply Center

Root of the Soviet government's power over the nation rests in its control of the supply of food, declared E. J. Strimman, Brooklyn, Iowa, in an address, at Regina, to a public meeting sponsored by the Canadian Society of Technical Agriculturists.

Long a student of conditions in Russia, which he studied during work there, Mr. Strimman described the growth and development of the mechanization of farming under Soviet guidance. Control of food supply was vital to the government, a minority party, to retain power, he declared.

"The five year plan has been a success in so far as it has introduced to Russia modern farming and the manufacture of farm machinery. It has failed to put grain production by machinery on a sound economic basis," he declared. "The Soviet government cannot possibly make foreign-bought machinery pay as long as they allow it to depreciate so rapidly."

Mr. Strimman emphasized the objective which politics was to develop of agriculture in Russia. Food supply was falling off in quantity since 1928. "A plan for economic development in Russia is absolutely necessary to keep the stamping out of individualism has eliminated conscious effort toward progress," Mr. Strimman said. It is important that the plan set the goal, a little high.

Police of the Soviet were being retrained in China, he said. "China would like to try some modern farming herself," he added. "To the Soviet will go the credit for the largest increase of 200 over the previous year. The 250 retail outlets had 774,778 members and as these were usually heads of families, they represented the majority of the four and a half million people of Scotland. They had 20,000,000 pounds in share and loan capital in the society."

It was intended to open shortly a linoleum factory at Falkland in five-year costing 100,000 pounds. New ventures were a creamery at Kilmarlock and extensions to grocery warehouses at Glasgow and Dundee, and to the fish curing station at Aberdeen.

Mercury Vapor Lamp Has Some Improvements
A new kind of light, a cool-headed mercury vapor lamp, was announced at the University of Cincinnati. In this lamp the sickly greenish hue of mercury vapor is completely changed by the addition of a pinch of potassium, the metal which flames in water. All the intensity of mercury vapor light is retained, says the announcement.

The discovery is classed as opening the way to more efficient illumination. It was developed in the department of physics by two young scientists, Dr. Isay Balkin and Dr. A. A. Wells.

No Liquor At Churchill

Law Is Strict Where Railway Is Under Construction

Although the new port of Churchill is now open to the public, the ban is still on liquor. No wine, rum or spirits are allowed further north than Gillam, mile 327, Hudson Bay Railway.

Many persons wonder why there should be a beer parlor at Mile 137, and none at Churchill. The explanation is that the Hudson Bay Railway is still technically under construction from Mile 327 to Churchill, and the Public Works Act does not permit liquor within a certain number of miles on either side of the right-of-way of a railway in the making.

Next Meeting In Geneva

World Economic Conference Adjourns Until Late In September

The next meeting of the World Economic Conference will be held in Geneva in late September, according to the program drawn up.

The steering committee was instructed to reconvene the conference whenever there is likelihood of the situation producing results. Plans for continuing the work of the parley were completed and submitted to the steering committee, Prime Minister Ramsay MacDonald, the president, assembled reports showing the history of the meeting and the work undertaken and accomplished.

An Indian farmer plowed up \$7,000 in a field. This ought to help the back to the land movement, it will be noted, however, he had to dig for it.

"Boy, call me a cab."
"Very well, guv'nor you're a cab, but I can't call you a hansom cab."

WHAT IS A NAME?—PLENTY!

When Norma Shearer, famous Canadian film star, returned to New York from Europe she was besieged by members of the crew for her autograph. Here is the screen actress obligingly signing for an admiring sailor film fan.

Permits Rest With Muggles

People Wishing To Carry Firearms Have To Prove Claim

Canada has been tightening up on its law regarding the carrying of revolvers. A law enacted at the recent session of Parliament makes it more difficult for a resident legally to possess a pistol or revolver, stiffens the penalty for illegal possession of such a weapon, and so is expected to have an important effect in the unending war on crime. In the past revolvers might be carried by private citizens who held permits issued by police authorities. Permits supposedly were issued only for the protection of life and property, but there was uniformity about the interpretation of circumstances which might justify their issuance. The number of permits in most cities never was large and Ottawa, for instance, with 125,000 people, had no more than a dozen or so—held in the main by bank messengers.

In order to tighten the regulations, and to make it still more difficult for desperate characters, parliament has enacted that for the future permits to carry revolvers will be issued only by the Royal Canadian Mounted Police and for the future permits to carry revolvers will be issued only by the Royal Canadian Mounted Police and for the future permits to carry revolvers will be issued only by the Royal Canadian Mounted Police.

All permits in future were automatically cancelled as from July 15, and their holders must prove their claims anew before a broader tribunal.

Any person found in possession of a revolver for which he has no legal license is liable to five years in the penitentiary. — Regina (Evening) Leader-Post.

Hudson Bay Fish

One Thousand Pounds Of Herring Shipped Weekly From Churchill

There is no doubt that commercial fishing may be carried out with freight rates are reasonable, and there is a fair price on the prairie, according to Tom Riddick, trading post operator who is acting as agent for buyers in the south.

"We are shipping more than 1,000 pounds of fresh sea herring to The Pas, Saskatchewan and Winnipeg, every week," said Mr. Riddick. "We can kill all over the fish are caught by trappers living here, and are secured prior to the departure of the trains so they will be in an excellent condition on arriving in the cities."

"The freight rates are now such as to encourage buyers. We have a rate of \$1.55 to The Pas by freight, and this has helped a lot. If a further reduction were made, I'm sure we could increase the business."

"With the next high tide, we should be getting salmon trout, a real tasty fish which will make a hit on the prairies."

Sound Like One

A man from Montreal was peering into the depths of the Grand Canyon.

"Do you know, asked the guide, "that it took millions of years for this great abyss to be carved out?"

The man from Montreal was tremendously impressed. "You don't tell me," he continued. "Why, I didn't know it was a government job."

Exhibit Of Canadian Paintings Now Being Shown In Britain Has Achieved Popular Acclaim

Japanese Keep Old Festival

Believed To Have Come From China About 130 A.D.

Festival of the Seventh Day of the Seventh Month. The Tanabata Matsuri (the festival of Tanabata), was observed by children at some primary schools in Tokyo and Suburbs recently. They were celebrating the Seventh Day of the Seventh Month, when the Weaver Princess Star (Star Vega) is supposed to meet the Herdboy Star (Star Altair) in the sky once a year on the banks of the Milky Way.

Virtually all had the memory of the festival had disappeared in the cities until a few years ago, when it was revived. The festival is essentially a children's affair and used to be observed in the homes.

Fall bamboo trees erected on the school playground were a feature of their branches hung with dainty cut papers of varied sizes and colors, bearing short poems. They also beautiful thoughts and sentiments, praise of the sky princess, the sky herder, the Milky Way, the Seventh Day of the Seventh Month, and all the wonder and mystery of the heavenly elements.

The festival is said to have come from China during the reign of the Emperor Kōmei (756-770 A.D.) and already had become fashionable in the Edo period. It was considered of religious significance when it first came to Japan, but has become an affair of Japanese interest as it has been interwoven into the life of the Japanese people.

Aeroplane Helps Climber

Party Makes Three Day Trip In Seven Hours

A twin-engine Sikorsky landed at the school playground, a 4,000-foot ascent up Garibaldi Mountain, to allow a party of ten Vancouver climbers to complete the ascent of the 11,000-foot peak at the head of Howe Sound in less than seven hours after leaving the city. Ordinarily the trip requires two or three days. The route was unique in British Columbia mountain climbing. Pilot E. P. H. Wells was in charge of the plane with Gordon Bulger as pilot.

Leaving the plane, the party formed two ropes of five climbers each. J. O. Cooper leading the first, and Roy Howard the second. The second was made up of the party. They ascended all the way and the party suffered from sunburn and fatigue. They reached the summit at 12:40 p.m. and after lunch commenced descent, arriving back home in the evening.

People Turn To Religion

Statistics Show Church Membership Increases In Hard Times

That religious fervor is a corollary of hard times, is well known and confirmed by the annual statistical report of the Christian Herald, showing church enrollment increased 225,222 in a single year. While one out of every six banks was wiped out, one out of every 45 hospitals forced to close, one out of every 22 businesses and industrial institutions forced to bankruptcy, one out of every 2,344 churches suspended during the depression, according to the Herald. Newspapers seen alive to the interest in the religious field. The managing editor of the New York Sun says that a religious pictorial, featuring four-column reproductions of famous religious paintings depicting thrilling episodes in the Bible, has brought in an unusual volume of favorable comment. — Editor and Publisher, New York.

Seagull Brought Companions

About Three Hundred Vied With Woman Every Day

Mrs. Elvira Chambers, of Salt Lake City, Utah, fed a lone seagull several years ago and, as a result, now feeds approximately 300 daily. The bird was first seen when Mrs. Chambers fed it. Return trips were made, with companion birds appearing in ever-increasing numbers.

Seagulls in Utah are virtually fearless, due to a rigidly-enforced state law making their destruction a serious crime.

A few one lift and carry 25.5 times its own weight, whereas a man's limit of weight is about equal to himself.

Women decoyesses of the Church of England now total 248.

The show of Canadian water colour now touring Great Britain, has achieved remarkable results. The stimulus provided by the exhibition in Great Britain comes mostly from press comments and purchases. Among the interesting statements are those of G. D. S. Dainton, parliamentary secretary of state for Scotland, who says they show the Dominion "is on the high road to developing a national school of art of its own. Dignity was found in the pictures, along with brilliance of color, breadth of view, and a large and solemn quality in the best of them which perhaps could not be found so easily in an inland school of painting. We need not at all picture came from the heart of a great country."

"The mastery of the Canadian artists," says the Glasgow Evening Herald, "have departed from the traditional use of the medium, depending on bold contrast and emotional intensity of form to secure effects."

"It is high time that we saw what artists in other parts of the empire have to offer," says the Glasgow Evening Times. "If they are painting with the same imagination, and have developed as vigorous a technique as these Canadians. They have at their disposal scenery on a scale unknown in Britain. But few of them are content to reproduce the ready-made pictures of their far-flung countryside, of their towering mountains, or their vast lakes. Most of them avoid facile naturalism. They see the landscape pervaded by a spiritual quality and they interpret this in terms of arresting design and decorative colour."

"The Canadian painters are not afraid to use bold colors in broad, sweeping terms," states the Edinburgh Dispatch. "The result is some very clean-cut paintings, brightly colored, and exhibiting a simplicity of quality which compares favorably with some admirable works in the other Empire."

"Peter Haworth's Rocks—Nova Scotia has a startling, clean-cut attraction, a coast scene made remarkable through the firm grasp of the artist's draftsmanship," states Robert Hurd, the critic. "The almost architectural character of some rock scenery can materially aid the painter in composing his picture, more especially in giving an expression of massive and rugged beauty. Mr. Hurd has exploited this means fully. We could, when looking at this work, with its firm drawing, how much the laborer's mental picture of foam-sprayed cliffs that we see dotted in our public galleries are the exact antithesis of the painting. It is typically Canadian art."

Will Ogilvie is the most advanced artist in the Canadian group. Canadian pictures on the whole are strikingly different from those of land or seascapes, but Ogilvie makes use of symbolism, as in his "Morning Sun and Rhythm."

Sheriff's Dream Came True

Sheriff George Hidden in Church Just As He Saw Them

Sheriff George Barham sat in his office at Bloomfield, Montana, his feet on his desk, and went to sleep. He dreamed he saw someone enter the Methodist Church at Advance, a nearby town, with a basket of eggs. Then the sheriff woke up. The dream made such an impression on him that he called the marshal at Advance and the Rev. J. L. Glass, pastor of the church. He asked them to go to the church and see if everything was all right. In the attic Box Book, has brought in an unusual volume of favorable comment. — Editor and Publisher, New York.

Occasional Wife

BY EDNA DOW WESTER
Author of "The
Lustful Girl"

SYNOPSIS

Camilla Hoyt, young and beautiful student in an art school, unconsciously sketches the head of a fellow student during class and when she is supposed to be drawing a Grecian vase. The professor, looking at her sketch, embarrasses Camilla by having Peter Anson, the boy whose head she sketched, criticize her work before the class. Afterwards Camilla goes to the park outside to cry. A hand touches her shoulder.

(Now go with the story)

CHAPTER II.

"Miss Hoyt," a man's vibrant voice pleaded, "may I apologize? I'm sorry if I offended you in class today."

Camilla dabbed frantically at her teary eyes with a square of bright linen, then raised her head reluctantly. She could not meet Peter's eyes. "Well, if you think I'm crying about that," she finally managed to say, "a husky voice that stung with sarcasm, you need not trouble to apologize. You presume a lot to think I even remembered it, don't you?"

"Oh," "I'm sorry," he said. "But if you are in trouble—that is, may I help you?"

To his amazement and relief, she laughed suddenly and looked up into his face as he bent over her anxiously. Her tear-stained eyes dazzled him, wide and shining like a child's and the tumbled black hair was like a cloud around her laughing face where the sun had just appeared.

A man in livery opened the door and scrutinized him.

"Well, my trouble isn't sketching still-life objects," she said, "but I worry about me. I'm all right. Just the blues, I guess."

His eyes twinkled with a spontaneous humor and he sat down on the bench beside her. "What kind of blues—Limbache, St. Louis or any particular brand? I might know the cure."

"Just the black-blues. Now there's an idea for a new blues song. If your ambitious to write a radio hit."

He shook his head, smiling. "I need all my inspiration for figural figures."

"Oh," her voice held awe. "You're a sculptor."

"Well, that's what I want to be. It happens that I've studied with Professor Drake before, and am finishing next month. I only went into this sketch class for critical training."

"No wonder you laugh at us."

"Not at all. You have me wrong, Miss Hoyt. I wasn't laughing at you, really."

"Laughing with me, then?" she suggested, with a roguish tilt of her chin.

Peter chuckled with relief. "That's better," he declared. "Whom had were you sketching—the profs?"

"No—yours."

"Yes. I think it is a beautiful head and I couldn't resist sketching it. Besides, it was right in the way so I couldn't see the old study-object, anyway."

"KING OF PAIN"

RHEUMATISM

"I'm sorry. I didn't see you tell me."

"Because I didn't care about sketching still-life, anyway. I much prefer living models."

"You'll get that next year."

"There'll be no next year here. I'm not studying to be a famous artist with immortal statues and all that."

"I didn't suppose you were," he admitted, suddenly more aloof. "The idea that anyone could be serious about ambition probably amuses you."

She hesitated a moment before replying thoughtfully. "Not at all. It interests me, very much." Her earnestness was almost reassuring.

"And you are serious, aren't you?"

"Dead serious," Peter declared. "Why, I ——" he hesitated, then changed the subject abruptly. "But I'm just as serious about something else that I'd rather talk to you about, but don't laugh at me even if you do refuse me. Will you let me entertain you some evening?"

He misinterpreted her quick look of surprise and her hesitation. "Now I am presuming a lot, I know."

"No why, no of course not. Please don't think I—"

His chance, perhaps the only chance he would have to talk with her. He interrupted desperately. "I promise to think nothing. If you will let me see you again—" then with more courage, "how about this evening?"

"By eight o'clock, he had scooped his conscience, withdrawn half of his emergency fund—he had pledged himself to return at least half of it to the bank the following day, but he had to flash a roll, didn't he?"

He rented a tuxedo and a tax-cab, and was ringing the doorbell at the imposing Hoyt mansion across the park from the art school.

A man in livery opened the door and scrutinized Peter with practiced caution.

"Who doesn't know? Sure, I'll be seeing you then."

He saluted blithely, turned into the parkway and strode away. But his smile changed to an anxious frown as soon as he was out of Camilla's sight. Orchestra seats at the Majestic and supper at the Madox club. If he performed famous food and hot music. He did, if he could afford a preference. But he couldn't. Such an evening's expenditure could cost Peter an allowance and expenses for a week, and he was not a very money man.

What to do, now? Hadn't he leaped into a devil of a mess, just such as he was forcing himself to avoid for two months? Didn't he, Peter Anson, making his own way to a career, know better than to get mixed up with snooty girls like Camilla Hoyt, whom it cost a fellow a fortune to entertain? He did. Then, why hadn't he watched his step? Well—what were you going to do about it when you discovered that Camilla Hoyt was the most adorable and desirable creature in the world and you were mad to be near her, at the same time you feared her?

Professor Drake had precipitated the trouble upon him, and he could not upon her in the park in tears had engaged him. And here he was, scarcely daring to breathe and wondering how to escape from his dilemma.

He shoved his hand into his trouser pocket, knowing that it would encounter only a few pieces of change. He poked his finger into his vest pocket, knowing that a lone five-spot was folded there. It represented his week's allowance for food. His thoughts leaped fearfully to a small deposit in his name at the bank, put there thriftily and with sacredness to meet emergencies. Peter smiled ruefully. Was this an emergency? It was, and it wasn't. If he could bring his conscience to admit the first thought and deny the second—

By eight o'clock, he had scooped his conscience, withdrawn half of his emergency fund—he had pledged himself to return at least half of it to the bank the following day, but he had to flash a roll, didn't he?"

He rented a tuxedo and a tax-cab, and was ringing the doorbell at the imposing Hoyt mansion across the park from the art school.

A man in livery opened the door and scrutinized Peter with practiced caution.

(To Be Continued.)

Danish Capital Is Lively

Copenhagen Has Shown No Sign of World Depression

Refreshing signs are seen in Copenhagen, the only one of the world's notoriously sprightly cities which has not become a white heat brightly since the rainy days of '29.

The Prime Minister, Herr Stauning, sitting in a night club after midnight, perhaps the only prime minister in the world who doesn't allow the state of state to depress him.

Copenhagen's gallant bicycle parade dashing along Osterbrogade at 5 p.m. a ravishingly beautiful cotton-headed blond, a day after yesterday in khaki, a mailman with a flashing red coat, two police officials in blue and gold grays, a half-dozen pink-cheeked and dapper party women with a Mexican hairdresser in a black attached to the handlebars and yipping at a great Dane on the sidewalk. College students wearing glasses and carrying brief-cases two young ladies highly powdered and rouged.

Tivoli, which in any other country would be just another amusement park, swarming with Copenhageners anxious to waste their money on fortune wheels, and a very attractive booth where one throws wooden balls at plates of glass.

The traditionally lively Copenhagen newspapers, dividing their front pages between the economic conference and a sensational murder case, the only law in which seems to be that no one is sure whether a murderer really took place.

The canal at Gammel Strand full of fishing boats and floating fish stalls in which swim thousands of flounder and eels. The famous row of fisherwomen, cruelly stunning live eels and shouting at the noonday customers.

A ball driven into the counter of a hotel near Malteisen Bridge, England, indicates the boundary of two counties, and customers on the Buckingham side can be served a half-hour later than those on the Berkshire side.

Mrs. Patience Round, who recently celebrated her 102nd birthday in Cradley Heath, England, was a chain maker for 70 years.

A traffic expert says many drivers have no sense of right and wrong. Many of them haven't even a sense of right and left.

No British-American Air Service Planned

Concrete Scheme Is Not Under Consideration Yet In England

Conversations have been under way, but no concrete scheme for regular transatlantic air service between the United Kingdom and the North American continent by way of Newfoundland is under consideration at present, said Sir Philip Sassoon, Under-Secretary for Air in the British House of Commons.

Mr. Philip Sassoon, a distinguished aeronautical enthusiast, told questioners there was no thought at the moment of a visit of an international commission to Newfoundland in regard to establishment of airports for such a service. This corrected an assumption by Geoffrey Le Mayeur, Liberal.

The British Government, however, had been conferring with the Canadian and Newfoundland representatives in the United Kingdom to obtain general lines affecting the possible future organization of air service to and from Newfoundland, the secretary said guardedly.

He added, however, he was not in a position to give more detailed information, although to prevent misunderstanding he would emphasize no concrete scheme for transatlantic services was at present under discussion.

Speeding in Former Years

Twenty Miles An Hour Drove Him 58 Years Ago

An issue of a Kingston newspaper of the year 1900 tells of a police case in which the late B. W. Folger, one of Kingston's leading citizens and a horse owner, was fined ten dollars and costs for speeding on the streets with his fast driver. Evidence was given to show that Mr. Folger was driving at a three-minute clip, or at about twenty miles an hour. W. F. Nickle, nephew of Mr. Folger, and then a young lawyer, defended the accused, and gave notice that he would appeal the decision of the magistrate.

But what a change in conditions! Now automobiles dash the city streets at rates decidedly in excess of twenty miles an hour and there are relatively few summonses for speeding. Thirty-three years ago, a great commotion was caused when a citizen allowed his driving horse to make twenty miles an hour on the macadam roads, there being no paved roads then. Perhaps there would be a hubbub today if a racing horse was driven along a street at a twenty-five mile clip.

Interesting Discovery Made By Excavations In Mexico

Excavations in the heart of Mexico have discovered an ancient structure like a Mayan temple.

Archaeologists were unwilling to pronounce it definitely of Mayan origin, but nevertheless said it might be such and intimated their present theories might be upset regarding the tribe which inhabited the Yucatan peninsula and Central America, and disappeared mysteriously about the 14th century.

Had Good Reason

Two men who had attended the village church were discussing the service.

"The vicar certainly preached a wonderfully strong sermon on vanity and extravagance," said one.

"Yet," the other said, "he was sitting right in front of him, wearing his new dress and new hat," put in the other.

"Oh," said the first, "that explains it! I wondered why he was so worked up."

Skateboarders are recognized legal on the provinces of Canada in social and public health legislation.

Less than one-twentieth of the people in Britain now pay income taxes.

"Miracle Fountain" Still Flows

Lightning Brought Water To Georgia Prisoners 70 Years Ago

The "miracle fountain" of Andersonville, Georgia, is still flowing. 70 years after lightning brought water to the wilderness in time to save a multitude of federal prisoners, dying in a hostile land. There is a monument there, on the scene of American civil war strife. It's a national shrine.

More than 12,000 Unionists died at Andersonville, where there was a stockade in which 45,000, many of them wounded, were herded.

Sanitation was the prison's greatest problem—and the prisoners who looted and slew their comrades. The scarce water supply at Andersonville was contaminated.

August and a relentless Georgia sun scorched prisoners and their Confederate guards alike. Some prayed some sang. A black cloud dropped over and a bolt of lightning crashed over the stockade and tore away the earth almost in the center of the prison yard. Water gushed from the hole—some called it Allens after the day somebody remembered the spring and a monument grew around it. Water still flows between the graves and brings richly green the grass on hero-mounds.

THE RHYMING OPTIMIST

By Alice Michalson

THE YEAR

I thrilled with joy in May, When all the land was gay.

When all the multitude of birds In field and wood

Offered their songs in gleam And song and song and song

When every road upland Lured me to journey afoot

To climb each swelling crest, To peer to view east, west

The sun-wet world, so fair, No sorrow could be there

But summer could not stay, Nor the child-heart of May

Though in life's summer-time The deeper notes must climb

They sound a braver tune, Ringing through golden June!

And mellow in the fall, The songs of living call

Remember for memory Of joys that used to be

Each season as it goes To some sweet measure flows

Winter, though grim and chill, May move to music still!

Policeman Proved His Point

Convinced Ladies That a Man Was Really Important

Three young ladies of charm were making what justly may have been illegally good time up the avenues of the North

avenues of the North when a motorcycle cop came up from behind and drove along beside them. The driver of the car slowed down and looked innocent, but this proved unnecessary, for the officer was pleased almost courtly. What he wondered, were three such pretty ladies doing out alone on such a nice night?

The first of the ladies remarked that this was fun, but what she really wished was for a police officer around the city. "Come on, said the cop and he shot out in front of their car, motioning them to follow. With skins screaming, he led them at sixty miles an hour through red lights and scattering traffic. Then he dropped back, remarked "You see, a man is important" and with that turned off down a side street.—The New Yorker.

Arranging Hugs Air Derby

Race From England To Australia Starts In London, 1934

One of the events of the Victorian centenary celebrations is a great air race from England to Melbourne. Cash prizes have just been issued.

Cash prizes totalling £10,000 and a gold cup valued at £500, are offered for championship and handicap events, and each pair who competes will receive within 16 days will be given a gold medalion. The races will start on October 20, 1934, from several aerodromes in England, and will finish at Flemington.

Any number of machines may be entered by competitors, and the same machine may be entered for both races, but only one amount of prize money will be payable in respect of each machine.

There is no limit to the number of members of crew, including passengers, and his own crew, sufficient food and water to maintain life for three days, approved flotation gear for the pilot and every member of the crew, and not fewer than six smoke signals.

Ever Shelves with HANDI-ROLL

35 feet of white or colored paper for covering shelves, lining drawers, etc. Copeland Paper Products Co. HAMILTON, ONTARIO

Little Helps For This Week

"He that is faithful in that which is least is faithful also in much."—Luke 16:10.

The trivial round, the common task, Would furnish all we ought to ask; Moon to do duty ourselves; A Task To bring us daily nearer God.

Exactness in little duties is a wonderful source of cheerfulness. We are too fond of our own will. We want to be doing what we fancy mighty things; but the great point is to do small things when called to them in a right spirit.—E. Cecil

It is not on great occasions only that we are required to be faithful to the will of God; occasions continually occur, and we would be surprised to perceive how much our spiritual advancement depends on small obediences. The unrelenting retention of simple and high sentiments in any duty is hardening the character to that temper which will work with honor under all conditions.—J. W. Emerson.

Caring For Cut Flowers

Many Ways Of Keeping Blooms Fresh For Days

Everyone knows the old tip of putting an aspirin tablet in the water as a pick-me-up. But do you realize that the flowers must be given fresh water after an hour or so, or the drug may have the opposite effect. Aspirin remedy for flowers that have been out of water for some time is to split the stems, plunge them into a jar containing three inches of hot water, and keep them in the dark for an hour or two. But this will be useless unless you cut off the dead pieces of stem before putting the flowers in the vases. Tulips that bend over with the weight of their heads are usually treated by wrapping in stiff paper. But do you know that you can stiffen the drooping stems with starch? Put a small piece in the water and watch the result.

An Egyptian Poo-Bah

Professor Flind, Grave Of "First Man Under the King"

Professor Selim Hassan, working on behalf of the Egyptian University, has discovered in the course of his excavations of the so-called Fourth Pyramid the grave of a veritable Poo-Bah, the Fourth Dynasty.

Stela in the tomb describe him as Director of Finance, Keeper of the King's Food, Great Priest, Judge and Governor of Districts, and First Man under the King. Jars, vases and other utensils to the number of sixty were found in the tomb, many of them being of beautifully polished copper. Round the neck of the Poo-Bah was a thin gold thread, while on his left forearm he wore a piece of turquoise and a bracelet of gold gold.

Natural Ice Box

Refrigeration problems of the Sedgewick camp of the civilian forest conservation camp, New Mexico, were recently solved by the discovery of a natural ice cave a few miles distant.

Meat for the camp in western Nevada, where the Fourth Dynasty Stela in the tomb describe him as Director of Finance, Keeper of the King's Food, Great Priest, Judge and Governor of Districts, and First Man under the King. Jars, vases and other utensils to the number of sixty were found in the tomb, many of them being of beautifully polished copper. Round the neck of the Poo-Bah was a thin gold thread, while on his left forearm he wore a piece of turquoise and a bracelet of gold gold.

Mr. and Mrs. P. J. Bossett, Mrs. S. Poxon and Sam, left on Sunday for a ten days holiday in the mountains.

Dr. and Mrs. A. J. Wright motored down from Fairview, Alberta, on Sunday night and are visiting with their parents in the district.

Mr. and Mrs. Harley Davidson and Mr. and Mrs. E.J. Houston were Calgary visitors on Friday last.

Misses Vera Poxon and Daphne Clark, and C. O'Hallahan and C. Poxon returned on Sunday from a trip to southern Alberta, British Columbia and United States points.

Mr. and Mrs. H. Wilson and family of Mr. Poxon returned last Friday from their trip to Kamloops and Resolute Bay.

Harvesting is starting this week in the Carbon district, although little wheat cutting has been done as yet, while crops are still ready to be combined in some cases and a week's time with this warm weather will see extensive fall removal.

Mrs. Wallace and Linda arrived on Tuesday from Westlock and are visiting with friends in the district.

A number of the young people held a "weeny" roast down the creek on Sunday night.

A few errors appeared in our anniversary edition last week. The town council of 1923 should have read: J.A. MacDonald, reeve; R. J. Garrett and W.A. Houston, councillors.

The editor also stated that the board accepted Miss Lavey's application for teacher at \$42 per month. This statement was correct, although we learn that Miss Lavey later declined to take the school and Miss Hunter (now Mrs. E. H. Hays) was the first teacher in Carbon.

As we go to press on Wednesday the Carbon Stampede is well under way and fine weather has been granted for the occasion. A large crowd is in town.

and riders are here from many parts. The Hesseker band has been engaged for the day, and is scheduled to lead here this morning (Wednesday). It looks as if there will be a large crowd to witness the stampede events and no doubt many will take in the dance in the evening.

The editor received some fine cherries this week from his old home town of Kootenai, B.C. These cherries are of the Bing variety and are known and advertised as "the world's finest cherries." They are a little later than the ordinary cherry crop and for this reason are larger and sweeter than the usual variety of this fruit.

A crate of these cherries, in fancy pack, is on display in the window of the Farmers' Exchange. They are attracting wide-spread attention and many will be surprised to learn that these cherries average about an inch in diameter and many berries in a crate will measure over one and a quarter inches in diameter.

(Municipalities)

SALE AND REDEMPTION OF IM-
POUNDED ANIMALS (SEC. 48)

Notice is hereby given under Section 48 of The Domestic Animals Act (Municipalities) that one bay mare about 10 years old, branded 7 M on her shoulder was impounded in the pound kept by P. G. O'Hallahan, located on the N.W. 25-26-23 with, on the 26th day of July, A.D. 1933, and that the said animal was sold on the 7th day of August, 1933 to M. J. Butcher of Carbon and that said animal may be redeemed by the owner or on his behalf within a period of thirty days from the publication of this notice in The Alberta Gazette, upon payment of all fees and costs due to the municipality and the purchase of said animal.

For information apply to the undersigned.
R. P. TOLHANSER,
Sec.-Treas. of the Municipal District of Carbon No. 278.

COMMERCIAL, SOCIETY AND JOB PRINTERS

Let Us Do Your Printing?

All business houses need more or less printed matter, all of which is within the possibilities of the local printer. Yet how prone many are to pass up the home printer and let the orders go to city offices which have no interest whatever in rural communities except to get printing orders and the cash to pay for them. Business men, remember that the home paper is constantly promoting the interests of the home community and you owe it to yourself and your local paper to back up these efforts by at least having your printed matter done locally.

WHEN IN NEED OF PRINTED MATTER CONSULT

The Carbon Chronicle

Shall O. O'Hallahan hauled the first load of 1880 grain to the Alberta Pacific elevator on August 2nd. The grain was barley and averaged 30 bushels to the acre, and weighed 50 pounds to the bushel.

Arion Klassen motored to Didsbury over the week end and together with his brother and sister-in-law spent Sunday at Banff.

A number of residents of the south country attended the last service of the Rev. P. Wahl at Truett Sunday evening. Mr. Wahl has left for Portland, where he will reside in future.

GENTLEMEN—Sanitary Rubber Cloths. Send for catalogue or \$1.00 for fifteen assorted samples, European importations, highest quality. Postpaid, plain wrapper, same day as order received.—National Distributors, Box 143, Regina, Sask. 3t

DON'T ATTEMPT TO BE PRINTERS

Don't attempt to be printers. It does not pay you in the end, instead, have your local printer and other printing done at The Chronicle Office. We will quote you a reasonable price on all work. Not only this—if you are putting on an entertainment, etc., and have your printing done here, you get access to our free reader space in this newspaper, which is worth more to you than the paltry sum you spend for other forms of advertising. Don't pass up your local printing establishment when you have printing to do. Your patronage will keep a newspaper in Carbon.

Here and There

What is probably the world's farthest north gold course is located at Chesterfield Point on the northern shores of Hudson Bay in latitude 67. There are only four members and the fee which entitles the player to membership, is ten polar bear teeth.

An increase of over half a million head in the number of cattle on farms is recorded in a report on livestock in Canada for 1932, just issued by the Canadian Government Bureau of Statistics, with 4,531,000 head, compared with 3,991,000 in 1931.

The eye operation on His Majesty King George VI, of the United States, has been so successful that the king will be enabled to further operation, according to Dr. Vichinsky, public health director of Banff, who came to Vancouver recently about Canadian Pacific liner Empress of Japan.

A duck hunt in the once private lake of the Chinese Empress in the Forbidden City of Peking with a Chinese general as host and armed soldiers as audience was the experience described by the Earl of Cassary on his arrival at Vancouver recently in the Empress of Japan from a seven-month tour of China.

Paradise Valley, east of Lake Louise, in the Canadian Rockies, is the site selected for this year's summer camp of the Alpine Club of Canada from July 15 to 31. Some of the most spectacular scenery in the Rockies will be covered by the club—including the untamed peak of Mount Eiffel, in the shadow of which the camp will be pitched.

Close on 250,000 people viewed the crack London, Midland and Scottish flyer "the Royal Scot" on its way to the Chicago World Fair, as it passed through Montreal, Ottawa, Toronto and Hamilton over Canadian Pacific Lines. Re-assembled after landing from the fast freighter Beaverdale, the Royal Scot passed through eastern Canada in a veritable triumph.

Insurgents who Canadian railway officials believe will be one of the greatest rail travel movements in the history of the country, C. P. R. Hiddell, chairman Canadian Passenger Association, announces that commencing this month and extending into June, Canadian railways will establish a rate of one cent a mile for coach travel between points in eastern and western Canada and return. This constitutes an all-time low in Canadian passenger fares, and sales commencing from western Canada May 25 up to and including June 8, and from eastern Canada May 31 up to and including June 15.

Three out of five Strathcona Memorial Fellowships for transportation given annually by the graduate school of Yale University, are awarded to Canadian Pacific Railway employees or sons of employees. There was a total of 30 applicants for these fellowships. The three C. P. R. awards were to S. M. Gossage, eastern engineer in the O. K. Bay general manager, eastern lines; P. E. Savak, son of J. W. Savak, general superintendent, Quebec district; and Robert A. Emerson, son of H. H. Emerson, agent at Morden, Manitoba.

That Old Troublesome Word "IF"

ONCE upon a time most people were worried a lot by "IF." A few still are. You can tell them if you listen to them when they are shopping.

"If you're sure that rug won't fade...."

"If you're positive this is pure wool...."

"If you'll guarantee these eggs as fresh...."

"If you think this washing machine will work better than the other one...."

"If.... If.... If...."

The trouble with such people is—they don't read advertisements. People who do read them do not have to depend upon "ifs" in their buying. They know what they are getting, because they have the definite, printed, reiterated assurances of the advertiser.

Most people nowadays do read the advertisements. They shop intelligently and quickly. They know beforehand what they want, why they want it, and how much they will have to pay, and where to go.

INTELLIGENT BUYERS SUBSTITUTE "KNOW" FOR "IF"

BY READING THE ADVERTISEMENTS
